

UROP Project Policy (UROP) for 7th Semester BTech CSE Students

All 2023 Batch B.Tech. CSE students are required to undertake a **3-credit UROP Project in their 7th semester**, subject to the following terms and conditions.:

1. Group Formation

- Students must form project groups with a **maximum of 3 members**.
- Interdisciplinary and inter-specialization groups are allowed (i.e., students from different sections or specialization can form a group).
- Groups may consist of a mix of **internship** and **non-internship** students.

2. Faculty Mentorship

- Each faculty member may guide a maximum of **4 groups**, either in the role of **Supervisor** or **Co-Supervisor**. For clarity, **one group will be considered as one project**, and each group is expected to undertake **only one project**.
- All regular CSE faculty, and Ad hoc faculty with PhD are eligible to guide a students.
- Students can also choose faculty from **other departments of SRM University-AP**, provided the project involves a strong **computer engineering component**. **In such cases, the group must also choose a co-supervisor from the Department of Computer Science and Engineering.**

3. Project Selection & Approval

- An **Excel sheet listing available project topics** and faculty mentors is shared.
- Students should approach faculty based on project interests. Once approved by a faculty member, obtain a **Project-ID** from the mentor. (Format is: UROP_2023_facultyid_groupno.) (Example: UROP_2023_21001_1)
- A **consent letter template** is attached. Students must edit it with their project and group details, get it signed by the mentor, and **retain a scanned copy**.

4. Communication & Responsibility

- Internship students may **communicate with their mentor online**.
- Students are **solely responsible** for maintaining regular contact with the mentor and **updating them** on progress.
- It is the **student's responsibility** to demonstrate that the work is worthy of **3 academic credits**.

5. Attendance and Eligibility

- Students are required to maintain **weekly attendance** for all UROP-related meetings, reviews, and progress discussions as prescribed by the mentor/department. **If a student's attendance falls below the minimum prescribed attendance percentage, he/she will not be permitted to appear for the Final Presentation.**
- Since the **Placement Mentor and Project Mentor are the same** for this semester, failure to maintain the required attendance may also result in the student **not being permitted to participate in placement-related activities**, as decided by the department.

6. Evaluations

- There will be **three monthly evaluations** conducted by the **internal faculty mentor**.

- Evaluation criteria will include **progress made, technical depth, documentation, and presentation.**
 - There will be an external evaluation, will be done by other faculty members in in-person form.
7. **Submission Process**
- A **Google Form** will be circulated later to collect project details and upload the **scanned consent letter.**
8. **Outcomes and Grades**
- Students are **encouraged** to work with the same mentor in CAPSTONE project (8th sem) to increase the chance of producing **research output.**
 - To be eligible for **top grades**, the expected deliverable is **at least one of the following:**
 - A **conference/journal paper** (submitted or accepted),
 - A **patent** (filed or published).
-

- **Deadlines:** 17th April for consent letter submission.
- **Evaluation dates:** Tentatively is last week of working day of semester in-person in SRM AP Campus.
- **Plagiarism Policy:** All work must be original and properly cited; plagiarism may lead to disqualification. Maximum plagiarism in your project report should be upto 15 percent (excluding references).
